Class II Permissive Change for FCC ID: 2ADAT-T40S0TOS1

We want to add a new variant to the certified torque meter with the FCC ID: 2ADAT-T40S0TOS1

The new variant of the T40S0TOS1 is documented in the test report 040197RA. This type has a new rotor PCB shape, but all electronic parts and the schematics are the same. All other parts are the unchanged.

The external pictures of the stator have not been changed.

The test report 040197RA documents that the new shape of the rotor PCB emits a comparable magnetic and electrical field as the prior certified version.

The new PCB shape has no considerable influence for to the EMC radiation.

Sincerely,

A handwritten signature in blue ink, appearing to be 'H. Schuster', is written over a faint circular stamp.

Dr.-Ing. Hans Schuster
