Class II Permissive Change for FCC ID: 2ADAT-T12S3

We want to add a new variant to the certified torquemeter with the FCC ID: 2ADAT-T12S3.

The new variant of the T12S3 is documented in the test report 040197BHA. This type is applied with another type of RF amplifier (FET) as documented in the test report 04197BBB. All other parts are the same as in the T12S3 from the test report 04197BBB. Due to this change the pictures from the stator RF PCB and the schematics of the stator RF circuit have been changed. In future both types are available.

Sincerely,

A handwritten signature in blue ink, appearing to read 'M. Koslowski', is written above the printed name.

Dipl.-Ing. Michael Koslowski
